EDUCATION

University of Rajshahi

BSc in Engineering, Information and communication Engineering

01 2019 – 12 2024

Rajshahi, Bangladesh

TECHNICAL SKILLS

Languages: Python, Golang, C++, JavaScript

CS Fundamentals: OOP, DSA, SQL, Computer Networks, Design Pattern, System Design

Frameworks: Django Rest Framework, FastAPI, Microservice, React.js

Tools: Postman, Git, Docker, Elasticsearch, Redis

Databases: PostgreSQL, MySQL, SQLite, OracleDB

EXPERIENCE

ATI Limited

Software Engineer

06/2025 – Present

Dhaka, Bangladesh

- Designed and implemented backend system using **FastAPI** within a **microservices architecture**
- Developed and integrated four key services: **AuthService**, **HR Service**, **Common Service**, and **Gateway Service**
- Built **RESTful APIs** for inter-service communication and external consumption
- Utilized **Oracle Database** as the primary data store, ensuring efficient schema design and data integrity
- Collaborated with cross-functional teams to support both **web** and **mobile** application platforms
- Tech Stack:** FastAPI, Python, OracleDB

PROJECTS

Real-time-Leaderboard | Golang, PostgreSQL, Redis

08 2025 – 10 2025

- Built a real-time leaderboard backend using Golang, PostgreSQL, and Redis for high-performance ranking operations
- Implemented JWT-based authentication for secure user access and score submissions
- Designed RESTful APIs to submit scores, fetch global rankings, and retrieve user-specific ranks in real time
- Utilized Redis Sorted Sets (ZSET) to efficiently manage and update leaderboard scores
- Integrated database migration tools to ensure seamless schema management
- Focused on scalability, low-latency updates, and clean code architecture

Exam Grading System | FastAPI, Python, PostgreSQL

08 2025 – 09 2025

- Built a FastAPI-based exam grading system with PDF parsing and similarity scoring for automated evaluations
- Implemented exam creation, student management, and CSV result export with a Jinja2 frontend
- Designed extensible grading logic enabling future AI/LLM-based evaluation using FLorence 2 Model

Social Media Backend | Django REST Framework, Python, PostgreSQL

06 2024 – 10 2024

- Developed a Django Rest Framework backend supporting user authentication, OTP-based account activation, and password reset
- Implemented blog features: create, edit, delete posts with Draft/Published status, and user comments with CRUD operations
- Added post pagination, filtering, and search for improved content management and user experience

COMPETITIVE PROGRAMMING & PROBLEM SOLVING

Codeforces: 1000+ problems solved — Contest Rating: 1227 (max)

LeetCode: 400+ problems solved — Contest Rating: 1560 (max)

CERTIFICATIONS

Problem Solving - HackerRank

SQL (Basic) - HackerRank

Python - HackerRank
